## DOUBLE-DEC SieMaRo SCREENER

The SieMaRo screen offers an exceptional solution for effectively screening 99% of all loose materials. Screening between 6 and 80mm can be achieved with interchangeable screen decks

Process material on site and at any time, without great effort, with our screening plants for effective and cost-effective recycling in a wide variety of areas.

Our screening plants are suitable for the processing of almost all materials and are used in demolition companies, construction companies, recycling companies and in gardening and landscaping. They are operated by a vibration motor and have a long service life thanks to their robust design.

- Low profile design for transportability
- Optimised weight to performance ratio
- Detachable site transport frame
- Permanently fixed oscillating mounts providing sturdy construction, reduced noise & safe start-up and shut-down
